DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1- 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, page 2, line 21, “--- a ferrule ---” after “ and having” and before “flying out” is not clear whether it is the same ferrule with “a ferrule” on line 15 of the 1st page.

In claim 1, page 2, line 23 “ said ferrule” is not clear which ferrule is referred to.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22 and 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bradley et al [USPAT 5,396,572].

Bradley et al disclose an optical fiber connector having optical cord fixing member holding means [also a rear housing] 190[fig. 3], an optical cord fixing member 160, a tension resistive member 33, a cord outer jacket 30, an optical cord 31, ferrule holding means [also a front housing] 150, a ferrule 140, and an optical fiber 21.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bradley et al.

Bradley et al disclose an optical fiber connector having optical cord fixing member holding means [also a rear housing] 190[fig. 3], an optical cord fixing member 160, a tension resistive member 33, a cord outer jacket 30, an optical cord 31, ferrule holding means [also a front housing] 150, a ferrule 140, and an optical fiber 21.

Allowable Subject Matter

Claims 14-21, and 24-26 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose or suggest an optical connector plug and the method comprising all the specific elements with the specific combination as set forth in claims.

Art Unit: 2874

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Further references of interest are cited on Form PLO-892, which is attachment to this office action.
